

## OUR SPECIALIZED KNOWLEDGE

Migratory Bird Management solves bird problems for commercial, industrial, retail, multi-family and food processing facilities in Chicagoland and Milwaukee markets. We use a uniquely assembled team of biologists, construction experts, and customer service support to provide proven methods protect against economic losses and reduce human health and safety risks.

## THE SERVICES WE PROVIDE

• **Pest Bird Control:**

- **Exclusion & Deterrent Systems:** methods we use are site specific & we base our recommendations on a variety of observations & facts, including but not limited to geographic location, food sources, & building structures.
- **Nest Management:** helps property managers & owners reduce human health & safety risks caused by nesting pest birds. The most common species located in our service area include Canada geese, gulls, sparrows, swallows & pigeons.
- **Pest Bird Consulting:** site surveys completed by staff biologists & structural engineers; data analysis & reporting, if applicable; detailed report of the conflicts with possible solutions; site specific, integrated program design; program roll-out assistance.
- **Dog Service:** dogs & trained handlers to chase, harass, & work to keep geese & gulls off your property humanely.
- **Flight Control® Plus:** a sprayed application that repels geese by inhibiting their normal feeding behavior humanely.
- **Laser Bird Control:** We have used laser technology for bird control for the last twenty years. We are now a certified installer & dealer for automated laser technology & we have completed 40+ custom installations.

- **Environmental K9 Division:** comprised of an elite group of biologists, consultants, safety coordinators, & canine trainers with a thorough understanding of the unique challenges presented by working in large industrial, energy & wilderness environments.
- **Emergency Response:** provides innovative wildlife management services specializing in emergency response & proactive management to limit wildlife exposure during a spill, & prevent damage to resources & equipment caused by wildlife activity. Our scent detection division provides pinpoint leak detection services through our specially trained pipeline inspection K9s.
- **Wildlife Management & Consulting:** The presence of wildlife around energy, refining, & industrial facilities can be detrimental to both the wildlife as well as the facilities & its employees. Proactively minimizing the amount of wildlife around facilities will reduce the risk of exposure during a release incident as well as reduce emergency wildlife response costs during & after incidents.
- **Window Collision Prevention:** Dealer/installer of Feather Friendly®, a window treatment designed to reduce/eliminate bird collisions. Working within your budget/specifications, we can customize a solution for your windows & even provide educational signage & decals to promote your bird friendly programs!
